

EVE

Bringing Key Resources to Entrepreneurs

*Mera
Alfawares*

*Austin
Foster*

*Iqra
Almani*

*Duan
Rollins*

*Jamari
Brown*

Software

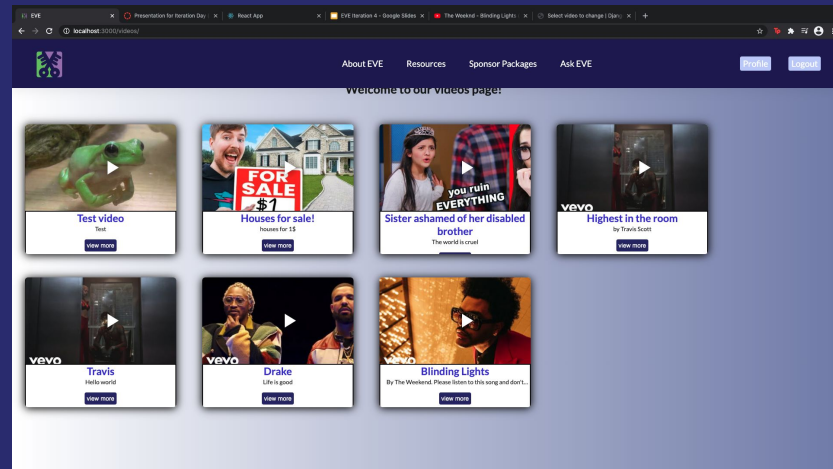

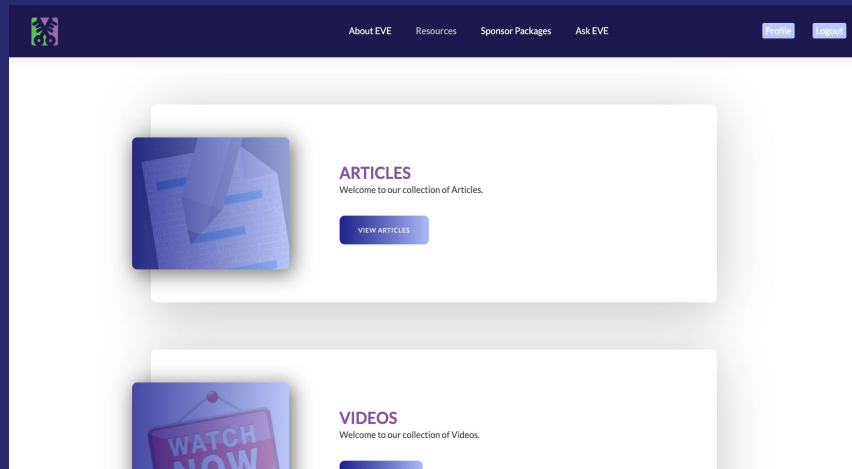

Old Functionality:

- Sponsors can upload videos and post articles

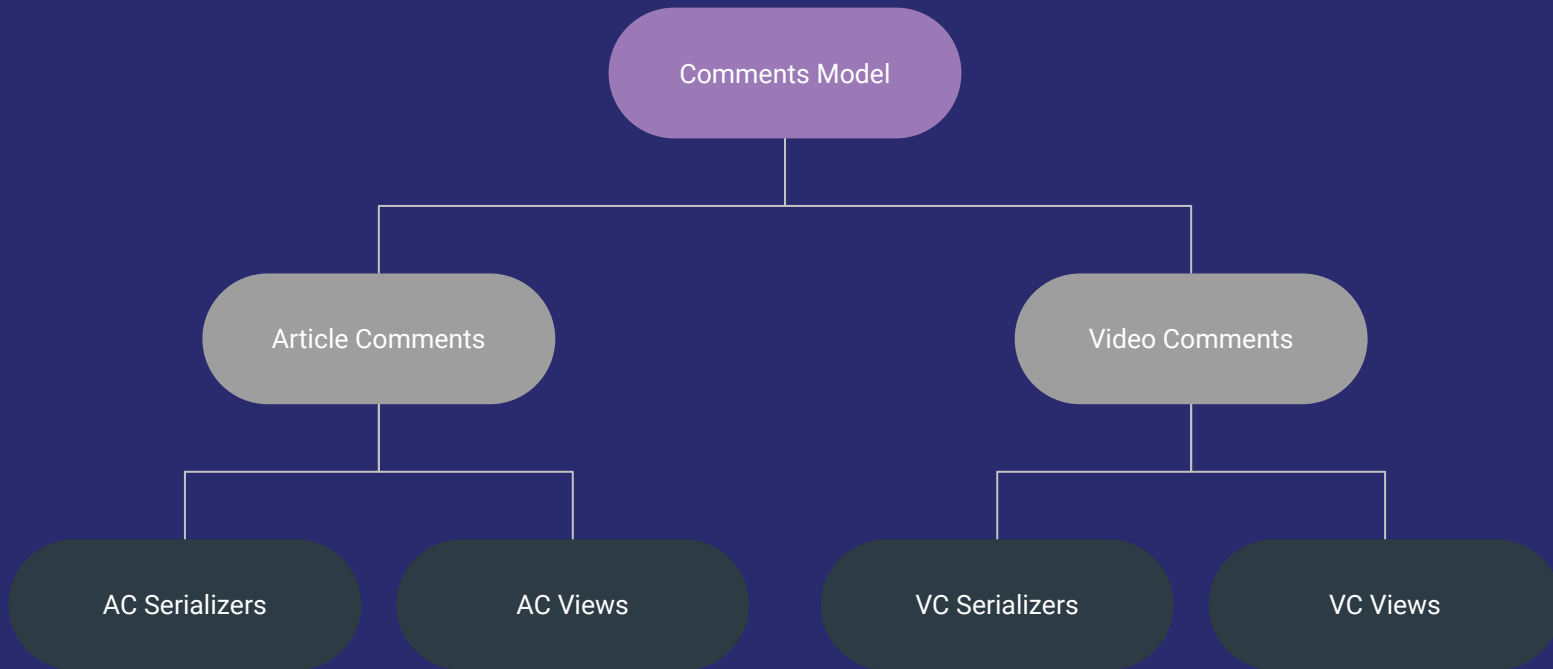

New Functionality:

- Only Sponsor accounts can comment on articles and videos
- Added Ask EVE page

Aesthetics

Modularity

Testing - Jamari and Mera

Front-End:

- Divided .js files in cypress
- New functionality coverage

Back-End:

- 76% coverage according to the coverage.py tool
- Tests for authentication, articles, videos, and comments

React Tests

Terminal: Local x Local (2) x +

ests\Tests_Sponsor.js.mp4

6: Problems 9: Git Terminal TODO

Externally added files can be added to Git // View Files // Always Add // Don't Ask Again (moments ago)

2 Event Log develop

1 Externally added files can be added to Git
View Files Always Add Don't Ask Again

Django Tests

A screenshot of an IDE terminal window. The terminal shows the command `python manage.py test` being executed in a directory `C:\Users\Jarvis\IdeaProjects\EVE-Back-End\eve-project`. The output indicates that a test database was created, no issues were identified, and 8 tests were run successfully in 3.077s. The terminal also shows the command to destroy the test database. The IDE interface includes a sidebar with '2 Favorites', a bottom status bar with '6 Problems', '9 Git', 'Terminal', and 'TODO', and a right sidebar with 'Event Log' and 'develop'.

```
Terminal: Local (2) × Local × +
Drop files here to open

C:\Users\Jarvis\IdeaProjects\EVE-Back-End\eve-project>python manage.py test
Creating test database for alias 'default'...
System check identified no issues (0 silenced).
.....
-----
Ran 8 tests in 3.077s

OK
Destroying test database for alias 'default'...
C:\Users\Jarvis\IdeaProjects\EVE-Back-End\eve-project>
```

Clean Code

Also, here's a good refactoring example.

Documentation

User.md

FeedBack

Client

- Our client was able to experience the website for herself
- She was very pleased with the addition of a comment section and an Ask EVE page
- She made a few comments about formatting and text font
- Also mentioned that the colors should be more inviting and less dull

Mentor

- Ben's primary focus was to get a good idea of what we had accomplished and what we will need to accomplish in the coming weeks
- Ben gave positive feedback on this iterations progress which then transitioned into plans for the future
- Mainly just planning for deployment and polishing the website

Report

During the UX testing with the client and the mentor, we noticed a couple things that require adjusting:

- Some of the font was not very legible (small font size, similar shade to its background, etc.)
- The styling of the website needs to be welcoming
- As an admin, Amina would like to be able to change the text throughout the website (it cannot be hardcoded in)
- Bug found with comment username display caught
- Emails received from Ask EVE should be more polished

We were given permission to use all current information regarding EVE since it does not contain any confidential content yet.

Future Iteration

Main:

- Create password functionality for user logins
- More user profile functionality
- Embedding zoom into events page
- Create podcasts page

Minor:

- Add more Tests

**What we each did for
this iteration...**
