# Requirement Match

Initial features:

- People being able to sign up as members or sponsors.
- Sponsors could post articles and videos.
- Sponsors could create live events such as zoom events and podcasts.
- Search bar functionality for pages.
- Sponsors could see their posted material on their profile page.
- Sponsors could choose between packages.

Current Features

- Sign up as members or sponsors
- Post articles and videos
- Create live events such as Zoom
- Query the articles and videos
- Dynamic profile page

Missing Features:

- Podcasts page: We decided and talked to the client that the Zoom integration would be enough for the events page.
- We don't have the payment set up for sponsors to choose between the sponsor packages. We didn't have the time to implement the feature, and the client seemed ok with it.

# Final Meeting

Reached out to Amina about meeting on either Wednesday and Thursday (April 28th and 29th)

# Transfer

Will transfer the software and all related documents by Friday (April 30th)

# Successful Practices

Group

- Working together helped facilitate progress
- Held one another responsible
- Timely progress

Individual

- Encouragement
- Motivation
- Open-mindedness

# Unsuccessful Practices

- Code Simplicity
- Testing

-   The team was unsuccessful in these practices due to time crunching, miscommunication, and not setting up the foundation of the project properly to avoid mistakes and tracing back frequently, which can waste time to make consistent progress.

# Missed Practices

- Django groups
- Code style guide
- Better use of Django abstract classes
- Linter
- React frontend templates
- Debugger
