Software

New functionality

- Being able to search through the articles.
- Sponsor and member separated sign up.
- Being able to add a scheduled zoom event.
- Sponsor profile dynamic.

Aesthetics

Changes to the site:

- Article cards redesign
- Full Article comment Section UI responsiveness
- AskEVE/Contact Us/Sponsor Package new background
- About Us page redesign
- Sign In/Sign Up redesigned
  - Can now choose between member/Sponsor sign up
- Sponsor Profile is Dynamic

Modularity

Same package structure for frontend and backend.

- Backend: Application -> Files (modules, serializers, urls, views, tests)
- Frontend: Component -> Javascript & CSS

Testing

INTEGRATION TESTS
- tests
  - Tests_1General.js
  - Tests_2SignUp.js
  - Tests_Login.js
  - Tests_Navbar.js
  - Tests_Resources.js
  - Tests_Sponsor.js

- Frontend:

- Backend: Tests for articles, videos, comments, and authentication

Clean Code

```jsx
const SignUp = () =>{

    const[tab, setTab] = useState("member");

    return (
        <div className = "signup-body">
        <main className="form-signup">
            <Tabs  className="nav-fill" id="controlled-tab-example"
                    defaultActiveKey="member"
                    activeKey={tab}
                    onSelect={(k) => setTab(k)}>
                <Tab eventKey="member" title="Register as Member">
                    <MemberSignUp/>
                </Tab>
                <Tab eventKey="sponsor" title="Register as Sponsor">
                    <SponsorSignUp/>
                </Tab>
            </Tabs>
        </main>
        </div>
    );
}

export default SignUp
```
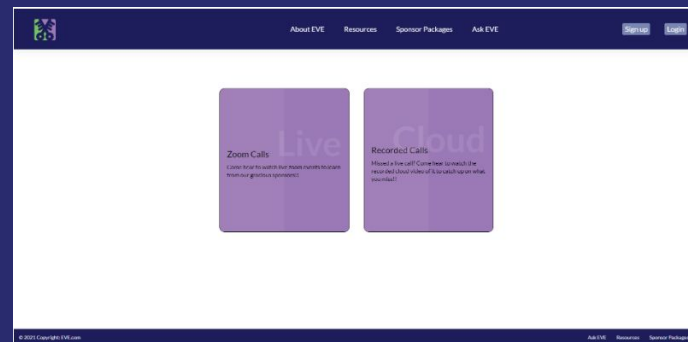

```jsx
const MemberSignUp = () => {
    const [newUser, setNewUser] = useState({
        email:"",
        username: "",
        first_name:"",
        last_name:"",
        is_sponsor:false,
        password: ""
    });

    let history = useHistory();

    const signUpMember = (e) => {
        e.preventDefault();
        Requests.createUser(newUser).then((response) => {
            if(response.email !== null){
                history.push('/login');
            }
        }).catch(status=> {
            if(status !== 201){
                alert("Something went wrong. Please try again.");
            }
        })};
```

```jsx
const SponsorSignUp = () => {
    const [newUser, setNewUser] = useState({
        email:"",
        username: "",
        first_name:"",
        last_name:"",
        is_sponsor:true,
        password: ""
    });

    let history = useHistory();

    const signUpSponsor = (e) => {
        e.preventDefault();
        Requests.createUser(newUser).then((response) => {
            if(response.email !== null){
                history.push('/login');
            }
        }).catch(status=> {
            if(status !== 201){
                alert("Something went wrong. Please try again.");
            }
        })};
```
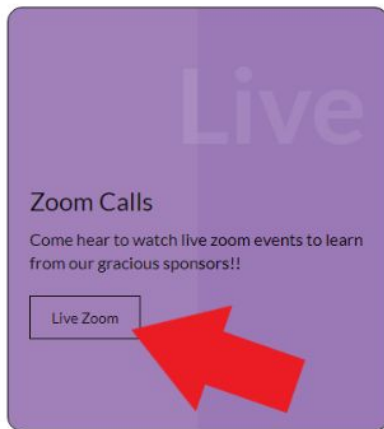

Documentation

Updates User.md
With new functionality

If you hover over the cards (or tap, on mobile) you can see the button to continue.

Zoom Calls

Come hear to watch live zoom events to learn from our gracious sponsors!!

Feedback

Mentor

- No true cohesion throughout the site/the pages don't follow a set format
- Creating a back button instead of having users use the browser's back button.

Client

- **Clarification on separating the "Contact Us" page and the AskEVE page**
- **Client will send voice over for the website.**
- **Some form of notification for regular members when sponsors create a zoom event**

Report

Mentor

- Was able to navigate through the site easily.
- Noticed that the site lacks cohesiveness as each page had different backgrounds.

Client

- Was able to navigate through the site easily.
- Font was smaller than expected on some pages.
- Noticed that a back button would help the user navigate the site much smoother.
